

PRINCESS ELISABETH ANTARCTICA: FIRST “ZERO EMISSION” STATION

IBM “SHAPE YOUR FUTURE”, Oct 7th 2008 (14-15h)

Princess Elisabeth Antarctica is the first “zero emission” Polar research station. This achievement is the result of a constant innovation process in design and development, assembly of available technologies, financing and operations. The station’s projected performance level sets a new standard in the polar environment and for building design.
