The Value of IBM Service Management

The ability to solve any service delivery challenge!

The *knowledge and capability* to deliver a specified business outcome *when it needs to occur, within the *time and cost* parameters you promised it would!*

But Don't Just Take Our Word for It...

IBM is acknowledged as player with the greatest differentiation

Decision Matrix: *Selecting an IT Systems Management Vendor*

Figure 1: The IT Systems Management Decision Matrix

IBM is in a clear overall lead in IT systems management, with its broad and extensive Tivoli offering that spans almost all aspects of IT systems management. IBM also receives the best user sentiment rating and has the best reputation among enterprises. The company suffers slightly from being associated with hardware in the large enterprise space, but this has not impeded its success in the market. Datamonitor believes IBM will continue to lead in this market due to its superior vertical reach and continuous improvement of its technology. Innovation and acquisitions and leadership in the SOA space will continue to give IBM an edge in terms of technology for the next two years.

DATAMONITOR

HUK-Coburg Insurance Company

Secures system uptime with IBM Tivoli Business Service Manager

Value Drivers:

HUK-Coburg's IT team faced challenges of ensuring services for internal and external customers ran smoothly and securely. They sought a way to effectively integrate and manage network operations end-to-end across highly heterogeneous environment.

Solution:

IBM Tivoli Business Service Manager which provides an integrated, end-to-end security, systems, network and applications management infrastructure and the ability to visualize how IT is aligned with business, effectively prioritize actions, and communicate information to multiple audiences.

Value Realization:

- Reduced volume of network events by a factor of 10
- Saved hundreds of thousands of Euros through automation of trouble tickets
- Improved customer service by enabling staff to quickly troubleshoot and isolate service problems
- Streamlined security management processes

“Through the use of Tivoli Netcool software solutions, we now can understand the status of our technical infrastructure and see what impact a problem has on revenue, services and users. This and the implementation of a separate system for security operations make it possible for our NOC team to respond the right way at the right time before any real damage can take place.”

*— Ewald Other
Manager, Automation Group*

Merkur Group

Effectively controls IT costs with automated, integrated service management

Value Drivers:

Streamline service management processes to reduce operational costs while maintaining service quality. Internal surveys showed that end-user satisfaction was high. However the CIO worried that as Merkur continued to grow, IT staff would not be able to deliver the same level of service.

Solution:

A unified platform that cost-effectively manages the entire lifecycle of IT assets and strengthens service management.

- IBM Tivoli Asset Management for IT
- IBM Tivoli Service Desk

Value Realization:

- Projected 25% increase in staff productivity, allowing the existing IT staff to manage the growing infrastructure
- Reduced costs and improved decision making process
- Better alignment of IT with business requirements

“By providing a single platform for asset and service management, Tivoli software enables us finally to understand the true costs of our IT services and the impact of these costs on profitability.”

“The sophisticated workflow processes in Tivoli IT asset and service management software help us ensure compliance with industry requirements.”

— Simon Znidar, Ph.D.
CIO, Merkur Group

IBM Service Management Delivers

Visibility

Control

Automation

Getting You Started Today...Relational Value Tomorrow

Visibility

TARGETED REAL-TIME DASHBOARD SOLUTIONS

GTS/Tivoli Offerings:

- Business of IT Dashboard
- Integrated Infrastructure Intelligence (i3)
- Availability Center for SAP

SWG Offerings:

- Rational Portfolio Manager
- Compliance Insight Manager

SWG Quick Start Offerings:

- Rapid implementation services for 'visibility' products – e.g., TBSM

Control

INTEGRATED ASSET CONTROL SOLUTIONS

GBS/Tivoli Offerings:

- Enterprise Asset Mgmt

GTS/Tivoli Offerings:

- IT Asset Mgmt
- Acceptable Use Monitoring

Tivoli Offerings:

- Software License Compliance

Tivoli Quick Start Offerings:

- Rapid implementation services for 'control' products – e.g., TADDM

Automation

AGILITY ACROSS OPERATIONS SOLUTIONS

GTS/Tivoli Offerings:

- IT Service Support
- Business Continuity for SAP

Tivoli Quick Start Offerings:

- Rapid implementation services for 'automation' products – e.g., TPM

Getting You Started Today...Relational Value Tomorrow

- IBM Service Management Strategy and Planning
- IBM Service Management Design and Implementation
- Rational Services

SWG Offerings:

- Rational "software delivery" platform

So Finally...Why IBM?

Breadth of Capabilities

Complete set of capabilities from Monitoring to Process Automation and Security and Governance to meet needs such as Green Datacenters and Next Generation Networks

Industry Leadership

Solutions for Telecom, Nuclear, Government, Oil & Gas etc., and more

Convergence

IT and Enterprise Assets, Telco and IT infrastructures, IT Processes and Business Processes

Integrated Technology

Best in industry integration: Role-based dashboards, Shared data across portfolio, Single process automation technology, Common Reporting

IBM Portfolio and Services

Integration with WebSphere, Rational, Lotus, DB2 and server portfolio supported by the leading services organization

Service Management beyond ITIL

Bring together processes, governance and business goals
