3) OFFICES IN NORWAY, SWEDEN, FINLAND, DENMARK, UK, UKRAINE, LATVIA, INDIA, BULGARIA, USA
Cité de Carcassonne

- Founded during the Gallo-Roman period (260 to 274 AD)
- 34 and 40 towers, 14 metres tall (333 AD)
- After 1226 an additional line of fortifications was added outside of the Roman walls
- Annexed to the kingdom of France in 1247
- Lost its military significance in 1659
Your attack surface is growing
So, you are thinking about «Breaching" your wall?

Questions:

What information are we talking about?

How to differentiate each type of information?

What to do with each type of information?

Who are owner/responsible for what type information?

What operational model is acceptable/compliant?
Compliance and Risk

Compliance consist of
• Legal – governmentally defined
• Contractual – customer/service recipient defined
• Reputation – commercial/marketing defined

Most met by local delivery:
• To Norwegian customers in Norway
• To Swedish customers in Sweden
• Segregation between customers safeguarded
• Access control to customer deliveries safeguarded
• Mostly based on trust – supported by audits (external and internal)

RISK MANAGEMENT
• Do Risk assessments!
Our Customer Advice – key tasks:

- Define key parameters for evaluating suppliers on security/quality
- Risk Assessment
- Evaluate & Select

- Contract must include Security and Audit Requirements
- Security Governance (boards, reporting)
- Assurance (ISAE3402)

- Executing the contract and managing operations

How do we do it?
En chatbot kan forbedre kundens opplevelse og frigjøre tid for kundeagentene.

Chatboten er et dataprogram som svarer på spørsmål i meldingsapplikasjoner og chatvinduer. Ved hjelp av avansert maskinlæring læres chatboten opp til å forstå naturlig språk som gir bedre svar på spørsmål fra kundene – bedre kundeservice med chatbots!

Security is on top of our agenda when supporting your digitization journey. The rapidly changing landscape of IT services requires us to rethink, focusing on how data is managed and how to keep systems secure and users protected.

Security Services providing control and insight of potential risks and threats are critical to reach digital success.

We provide a complete range of Security Services - from the server anti-malware to a security framework for public cloud containers.
Security Information and Event Management

- Security analytics
